

Alpha Pharmaceuticals

Global Product Presentation

Formal overview of the company's export capabilities, veterinary segment, human vaccines and

Business foundation and market position

Who we are

Alpha Pharmaceuticals is a Vadodara-based export oriented company established in 2017, engaged in generic and branded prescription medicines, pharmaceutical formulations, vaccines, and veterinary health products.

Trade readiness

The company operates as a registered merchant exporter under DGFT, enabling compliant import and export activities and supporting dependable service to multiple international destinations.

Supply strength

A robust domestic supply chain and long-term partner relationships have created a practical platform for international trade, repeat business, and responsive execution.

Geographic reach

Alpha Pharmaceuticals serves customers across more than 10 countries while maintaining a business approach centered on transparent dealings, dealings, customer satisfaction, and reliable coordination.

Registered and unregistered supplies with market-aligned support

Collaboration pathway

How Alpha Pharmaceuticals supports international partners

Complete portfolio for animal health markets

Alpha Pharmaceuticals positions its veterinary business as a complete offering of vaccines, medicines, and nutraceuticals for companion animals, poultry, and medium and large animals across international markets.

Coverage: pets, poultry, medium animals, and large animals.

Product forms: vaccines, medicines, nutritional supplements, and allied veterinary products.

Commercial focus: export supply, quality alignment, and market-responsive service.

Veterinary Growth Platform

Built to serve preventive care, treatment support, and nutritional management through an established export network.

Core veterinary categories

Veterinary vaccines

Preventive solutions intended to support immunization programs across companion animals, poultry, and livestock-oriented markets.

Medicines

Therapeutic products positioned for routine veterinary treatment requirements and market-specific healthcare demand.

Nutraceuticals

Nutritional support products designed to strengthen animal wellness, recovery support, and performance maintenance.

Pet products

Solutions for companion animals, including supplements and veterinary care products suitable for private clinics and distributors.

Poultry range

Vaccines and healthcare products aligned with poultry farm management, flock health, and productivity support.

Large animal care

Products aimed at medium and large animals, supporting farm, dairy, and field veterinary applications.

Human vaccines and pharmaceutical Supplies

Export-led pharmaceutical offering

The company presents itself as an exporter of generic and branded prescription medicines, pharmaceutical formulations, and healthcare products supported by compliant global trade practices and timely execution.

Human vaccine supplier role

Human vaccines are positioned as part of the broader healthcare portfolio, supported by India's reputation for quality-focused and cost-competitive manufacturing.

Quality and compliance orientation

Alpha Pharmaceuticals emphasizes regulatory adherence, good distribution practices, product quality, and responsible customer support in export operations.

Customer relationship approach

Its communication positions trust, responsiveness, and long-term relationships as the base for serving distributors, institutions, and healthcare buyers in multiple markets.

Strategic supply categories

Product architecture

Oncology

Supply support for cancer-care related pharmaceutical requirements.

Plasma proteins

Specialty products for high-value therapeutic and institutional channels.

Biosimilars

Advanced therapy segment aligned with regulated and developing markets.

Pharmaceutical

Broad generic and branded medicine portfolio across treatment areas.

Registered & unregistered supplies

Flexible supply approach based on market registration status and buyer requirement.

Nutraceuticals & collagen

Wellness-oriented products for human and specialized healthcare demand segments.

Vaccines portfolio

Human and veterinary vaccine supply aligned with international quality expectations.

Export execution strengths

Regulatory alignment: DGFT registration and distribution-focused compliance support international trade readiness.

Supply continuity: robust domestic sourcing and established business relationships strengthen dependable execution.

Service discipline: timely response, ethical dealings, and transparent communication remain central to customer engagement.

Market flexibility: product coverage spans specialty, hospital, prescription, and animal health segments.

Commercial capability priorities

Illustrative capability mapping based on the supplied company positioning.

Growth narrative

2017 • Establishment

Company foundation with a business model centered on medicines, formulations, and healthcare trade.

Domestic network build-up

Operational strength developed through local market presence, supply relationships, and execution experience.

Export expansion

Merchant exporter positioning under DGFT supported wider global trade participation and customer onboarding.

Portfolio broadening

Business communication expanded to include veterinary health products, vaccines, nutraceuticals, and specialty specialty supplies.

Current direction

Focus remains on long-term partnerships, regulatory-conscious trade, and service-driven international growth.

Why international buyers can engage with confidence

Relationship driven

The company emphasizes transparent communication, ethical dealings, and long-term customer relationships.

Responsive service

Prompt response and timely execution are presented as core expectations in every market served.

Export experience

Existing international alliances and multi-country presence support smoother buyer engagement and continuity.

Wide healthcare scope

Human and veterinary segments allow broader sourcing conversations from a single trade partner.

Compliance focus

Good distribution practices and regulatory awareness support dependable supply positioning.

Business flexibility

Registered and unregistered supply options enable discussion for diverse product and market situations.

Representative enquiry areas

Veterinary business

- Veterinary vaccines supplier
 - Poultry vaccines supplier
- Veterinary medicines and nutraceuticals
 - Pet product requirements

Human healthcare business

- Human vaccines supplier
- Oncology product sourcing
- Plasma proteins and biosimilars
